

Substituted benzimidazoles, their preparation and their use as agents against parasitic protozoa

A b s t r a c t

The present invention relates to new substituted benzimidazoles, their preparation and their use as agents against parasitic protozoa. The active compounds are characterized by the following formula (I):

in which

X¹ represents chlorine or bromine,

R¹ represents hydrogen or C₁₋₄-alkyl,

R³ represents fluoroalkyl,

R² represents the radical $\text{—N—}\overset{\text{R}^4}{\text{C}}\text{—}\overset{\text{O}}{\parallel}\text{—OR}^5$,

R⁴ represents alkyl or substituted phenyl,

R⁵ represents alkyl.
